

CCF QLD MEMBER FEATURE: SEE GROUP

SEE Group is a family-owned group of companies specialising in civil construction and comprises of four companies - SEE Civil, Quarry Solutions, Civil Rent and DMC Quarries. We owe our ongoing success to our integrated approach to project delivery that our operating structure allows - securing resources and offering confidence in delivery.

Established in 1988, our 35-year success has been built by our experience delivering infrastructure and, urban and industrial development projects in Queensland and Northern New South Wales.

OUR CAPABILITIES

- Road and highway construction
- Airport infrastructure
- Civil rail infrastructure
- Water and utility
- Bulk earthworks
- Material processing
- Multistage urban developments
- Complex structures
- Mine infrastructure

SEE Civil, Quarry Solutions, Civil Rent and DMC Quarries exist to play a key role in civil construction and securing material needs for our projects, creating complete construction solutions. This robust integrated solution enables us to deliver value-for-money innovation, sustainability, and the ability to manage resources and supply throughout project delivery.

SEE Civil provides construction and engineering solutions for infrastructure and, urban and commercial development projects. SEE Civil specialises in bulk and complex earthworks, road and bridge construction, airside infrastructure and utility services. SEE Civil has developed industry-leading processes and technologies which contribute to improved environment, safety, quality, and social outcomes. Our clients and partners include private companies and State and Federal governments, delivering projects ranging from \$5M - \$150M.

OUR CURRENT PROJECTS

- Gold Coast Airport Southern Entry Road
- Tamborine Mountain Road Reconstruction Works
- Mount Lindesay Highway Upgrade: Stoney Camp to Chambers Flat Roads
- Inland Rail: Narrabri to North Star
- Tallebudgera Seawall Rebuild Project
- Pacific Highway Upgrade: Woolgoolga to Ballina
- Chambers Flat Road Upgrade
- Loganholme Biosolids Gasification Civil and Structural

Quarry Solutions and DMC Quarries are specialised quarrying businesses based on the north coast of New South Wales. Quarry Solutions and DMC Quarries source, manage, and operate fixed quarries, mobile crushing and screening sites, supplying to projects for state road authorities, local councils, and private developers. Our specialty stone products provide sought-after materials for use in landscaping, decorative and architectural concrete markets within the residential and commercial sectors.

Established in 2017, Civil Rent now manages and maintains over 170 pieces of modern construction machinery including highway trucks, as well as 230 light vehicles across Queensland and Northern New South Wales. The Civil Rent team of trade qualified technicians support our mining, infrastructure, residential, quarrying, and rental customers. The maintenance team is supported by a highly skilled Administration team utilising market-leading technology and software to streamline processes and systems.

SEE Group and its companies are committed to integrating economic growth, environmental resilience, and social progress as priorities in decision-making. Our goal is to create long-term benefits for the environment and the public. We value the natural environment and the wider community. We are committed to our goal of creating long-term benefits and using resources efficiently, responding to climate change, protecting the environment, and generating benefits for communities. Quality environmental practices remain a priority for the Group, and our goals are achieved through actions that represent our environment and sustainability values. SEE Group is a second-generation family-owned company with a deep connection to the community it was established in, and the communities that our

businesses operate. We are proud of our commitment to positive community impact through sponsorships, charities and donations, volunteering and, providing pathway programs into construction. We connect with our communities through meaningful initiatives and programs and collaborate with our major partners to deliver tailored programs.

As a company founded within the Gold Coast and Tweed regions, we value the talent and future of our community. In 2022, a regional SEE Civil project recorded an achievement of reaching over 285% of the total targeted training hours. These recorded hours of training contribute to upskilling existing workers through industry recognised training and provides employment prospects that strengthens the industry.

The SEE Group of companies continues to manage and evolve a comprehensive Integrated Management System (IMS) with third-party accreditations in line with ISO 9001:2015, ISO 14001:2015 and ISO 45001.
