SEE MINING

STRONG PAST STRONGER FUTURE

CAPABILITY STATEMENT

[OUR PROMISE]

WORK THAT LASTS

COMPANY OVERVIEW

SEE Group is an award-winning group of companies delivering major mining, infrastructure and urban development projects throughout Australia. Specialising in mining, engineering and civil construction, our group comprises four key businesses: SEE Civil, SEE Mining, SEE Fleet and SEE Quarry.

With more than 38 years of experience delivering complex, high-value solutions, SEE Group is built on a foundation of strong, relationship-based contracting. Our enduring success is driven by an unwavering commitment to safety, continuous innovation, and a dedication to exceeding client expectations.

A FOUNDATION FOR SUCCESS

[INTEGRITY]

OWN OUR INPUT

We uphold accountability and ethical conduct in all our actions. This means making decisions we can stand by, taking responsibility for our actions and work, and ensuring that safety is everyone's responsibility.

[INNOVATION]

LOOK AHEAD

We continuously seek new ways to improve and excel. We're agile and flexible in our approach, always developing our skills and expertise, and remaining open to new ideas and innovative solutions.

[COMMUNITY]

WORK AS ONE

We're all about teamwork, collaboration and collective growth. We celebrate success and achievements together, work as one cohesive team and ensure we recognise and utilise everyone's skills and contributions.

[DEDICATION]

GIVE OUR ALL

We're passionate and committed in everything we do. We work with a 'boots and all' attitude, driven towards success and maintaining a strong commitment to our goals and objectives.

OUR SOLUTIONS

WE PRIDE OURSELVES ON BEING COLLABORATIVE AND EASY TO WORK WITH.

SEE Group is a family-built business with a results-driven, transparent approach — delivering projects safely, on time and on budget. Combining expertise across our businesses, we provide innovative, fit-for-purpose solutions throughout the mining and civil construction lifecycle, with the agility and problem-solving edge to meet the demands of the resources sector.

SEE CIVIL

PRACTICALLY VISIONARY

BUILDING THE FUTURE WITH PRACTICAL INNOVATION.

SEE Civil specialises in construction and engineering solutions for major infrastructure projects in urban and industrial development, road and rail infrastructure, aviation and natural disaster reconstruction in Queensland and New South Wales.

SEE MINING

POWERING EXCELLENCE

DELIVERING INTEGRATED MINING SOLUTIONS.

SEE Mining is a leading mining contractor, capable of working in diverse environments and providing integrated services including mine establishment and infrastructure works, bulk earthworks, mine closure and rehabilitation works.

SEE FLEET

MODERN FLEET SOLUTIONS

DRIVING PROGRESS THROUGH RELIABLE FLEET MANAGEMENT.

SEE Fleet offers reliable fleet solutions with comprehensive maintenance services including logistics, whole-of-life asset management, scheduled maintenance and repairs, major equipment overhauls, design, fabrication, blasting, and painting.

SEE QUARRY

UNEARTHING SOLUTIONS

UNEARTHING SMARTER SOLUTIONS EVERY DAY.

SEE Quarry specialises in quarrying and material supply, and is a market leader in the delivery of high volume, high specification material supplies to projects including fixed and mobile crushing operations, sand mining and foam bitumen production.

POWERING EXCELLENCE

SEE Mining is a leading Australian mining contractor, delivering integrated mining infrastructure solutions across large scale, remote and technically complex environments.

Our core capabilities span bulk earthworks, tailings dam construction and mining infrastructure; supporting every stage of the mining lifecycle with precision, reliability and an unwavering commitment to safety and quality excellence.

With extensive experience across Australia's most demanding environments, SEE Mining partners with some of the world's most recognised mining companies, many of whom continue to engage us based on our proven track record, technical excellence and dependable delivery.

SEE MINING

ANOTHER SEE SOLUTION

[OUR INDUSTRIES]

TRUSTED BY INDUSTRY

Since securing our first mining infrastructure contract in 2018, SEE Mining has built a solid reputation across a diverse range of commodities including gold, copper, manganese, coal, and iron ore. Our experience spans both greenfield developments and brownfield expansions, highlighting SEE Mining's ability to navigate complex operational, geographical and environmental challenges.

Our valued client portfolio includes global leaders such as Anglo American, Rio Tinto, Newmont Mining, Newcrest and South32 (GEMCO). Each project is tailored to align with our clients' operational objectives and commercial frameworks, ensuring seamless integration with site strategies and timelines.

From early-stage design, and enabling works through to final construction and commissioning, SEE Mining delivers fully integrated solutions that combine technical capability, innovative practices and rigorous quality assurance. This holistic approach consistently achieves strong project outcomes, fosters long-term partnerships, and positions SEE Mining as a preferred delivery partner across Australia's mining industry.

[OUR CLIENTS]

STRATEGIC DELIVERY FOR TIER-ONE CLIENTS

Newmont™ Rio Tinto AngloAmerican

SOUTH32 NEWCREST MINING LIMITED

FLEXIBLE AND COLLABORATIVE CONTRACTING

SEE Mining brings experience across a variety of commercial and contract models, tailored to suit our clients' specific requirements, including:

- Early contractor involvement (ECI);
- Collaborative contracting;
- Schedule of Rates;
- Lump sum contracts.

These flexible delivery models allow us to tailor engagement structures to suit project complexity, client risk profiles and strategic goals.

Our strength in collaborative and ECI models enables us to contribute from the earliest planning stages; identifying risks, enhancing constructability and increasing cost certainty. By fostering transparent communication, shared accountability, and proactive problem-solving, we ensure superior coordination between design and delivery teams.

This collaborative approach provides greater certainty and balanced risk-sharing, enabling the delivery of high-value outcomes - particularly for complex mining projects and those with challenging or remote logistics.

PROVEN DELIVERY

PROVEN DELIVERY IN THE MINING SECTOR

With comprehensive operations systems, commercial agility, and a strong track record in collaborative project execution, SEE Mining is recognised as a preferred delivery partner for major mining projects across Australia.

Our ability to scale rapidly, integrate seamlessly with client's existing operations and procedures, and maintain consistent performance across complex and remote environments continues to attract repeat clients and long-term partnerships.

OUR APPROACH

OUR APPROACH TO SAFETY

SEE Mining is committed to eliminating harm, reducing risk and leading by example. By integrating smart technologies with behavioural accountability and visible leadership, we are creating safer, smarter, and more resilient project teams; where safety is not just a system, but a shared responsibility embraced by all.

Our ISO 45001-accredited safety management system, combined with hands-on leadership and demonstrated commitment to open and transparent communication, fosters a proactive safety culture that protects our people, our clients, and the communities in which we operate.

OUR INNOVATION

INNOVATION DRIVEN SAFETY AND PROJECT CERTAINTY

Our clients benefit from working with a delivery partner that leads with innovation, safety and certainty in every mining environment. Through advanced systems and smart technologies, we deliver consistent, high-quality outcomes by reducing risk exposure, improving safety and operational outcomes across every stage of project delivery.

AUTOMATION AND ADVANCED MACHINERY SYSTEMS

Our use of remote-controlled D11 dozers, machine guided GPS and proximity detection and collision avoidance systems ensures accurate and efficient earthworks with reduced operator exposure. This is especially valuable in high-risk environments, where safety and precision are paramount.

DRONE TECHNOLOGY FOR SMARTER DECISIONS

We deploy drone technology for rapid site surveys, construction monitoring, and environmental assessments. Drones provide high-resolution aerial data for real-time decision-making, reducing personnel exposure to hazards and improving overall project control.

REAL-TIME TELEMETRY AND PREDICTIVE MAINTENANCE

SEE Mining leverages telemetry and reliability-centred maintenance to monitor fuel usage, engine diagnostics, battery life, and tyre pressures. These insights enable predictive servicing, minimising downtime, optimising fleet performance, and extending the lifecycle of critical assets.

OUR EXPERTISE

As a trusted contractor in the Resource and Mining sector, SEE Group has a proven track record of delivering high-quality, fit-for-purpose infrastructure solutions for leading mining clients.

DELIVERING INTEGRATED MINING SOLUTIONS

By leveraging in-depth industry knowledge, an unwavering commitment to safety, and a culture of operational excellence, we specialise in the delivery of essential infrastructure that supports mining operations in even the most remote and challenging environments.

Our capabilities encompass bulk earthworks, the construction of haul roads, bridges, dams, culverts, critical water and tailings storage facilities and other mining services. From remote access roads to complex bridge and culvert installations, SEE Group has consistently delivered technically demanding projects for some of the world's most recognised mining companies.

[OUR EXPERTISE]

TRUSTED CONTRACTOR IN THE MINING SECTOR

[SAFETY FOCUS]

Uncompromising commitment to safe operations.

[PROVEN EXPERIENCE]

Major mining projects delivered for leading clients.

[OPERATIONAL EXCELLENCE]

On time high-quality delivery.

[REMOTE CAPABILITY]

Specialised expertise in difficult environments.

DELIVERING INTEGRATED MINING SOLUTIONS

PLANT HIRE

TIER ONE SOLUTIONS WITHOUT THE TEARS.

TIER ONE SOLUTIONS DON'T ALWAYS NEED TO COME WITH TIER ONE PROBLEMS.

SEE

MINE ESTABLISHMENT WORKS

SEE Mining supports clients through every stage of mine development and startup, delivering critical early works with precision and efficiency. Our capabilities include land clearing, topsoil stripping, haul road construction, drainage structures, tailings dams, and water storage infrastructure.

Leveraging our expertise in civil construction, we ensure a seamless transition from site establishment to full-scale surface mining operations. Our integrated approach adds significant value during the crucial early phases of mining projects, enabling timely and cost-effective delivery.

ANOTHER SEE SOLUTION

LOAD AND HAUL MINING SERVICES

SEE Mining provides scalable, efficient load and haul services with expert crews and a fleet of large-scale equipment, delivering reliable value across complex mining operations.

SEE Mining delivers high-performance load and haul solutions backed by expertise in bulk earthworks and access to a fleet of large-scale mining equipment. Our ability to mobilise efficiently and execute at scale ensures we consistently generate value for clients across diverse mining operations.

Our capabilities include the operation and maintenance of large-scale mining equipment, such as 350-tonne excavators, 220-tonne rear dump trucks, remote-controlled D11 dozers and a full suite of ancillary support fleet. This end-to-end expertise enables SEE Mining to deliver efficient, scalable and responsive load and haul services across complex mining environments.

SEE SOLUTIONS. NOT PROBLEMS.

WE SPECIALISE IN SOLUTIONS
THAT STREAMLINE THE SITE
BUT DON'T COST ON QUALITY

SEE

MINE CLOSURE AND REHABILITATION WORKS

SEE Mining delivers expert mine rehabilitation and closure works, shaping landforms and infrastructure for a sustainable future.

SEE Mining provides comprehensive mine rehabilitation services by drawing on our extensive experience in bulk earthworks and landform reshaping. Our capabilities include bulk dozer push, final landform profiling, topsoil spreading, and construction of drainage systems to support long-term site stability.

Committed to delivering high-quality, cost-effective outcomes, SEE Mining works closely with clients to support mine closure and facilitate sustainable post-mining land use. Our tailored solutions ensure compliance, environmental responsibility, and long-term landform integrity.

SEE Fleet

In addition to our mining services, we also provide tailored fleet solutions to support our clients, including dry hire and fully maintained dry hire. Operating as a strategic partner to SEE Mining and other leading contractors, SEE Fleet delivers scalable, efficient and high performing equipment solutions backed by industry experience.

Our modern fleet is purpose-built for tough environments, combining rugged reliability with the latest in mining technology. Each machine is supported by rigorous maintenance protocols, telemetry tracking, and expert in-house support teams, ensuring optimal performance and productivity.

YOU GOT A HARD TASK?

HARD WORKS

WHATEVER THE TASK, OUR DOWN TO EARTH TEAM IS UP TO THE JOB.

At SEE Mining, we thrive on challenges and take pride in our relentless work ethic. Hard work isn't just what we do - it's who we are. From complex projects to the toughest assignments, you can count on us to deliver results with dedication and integrity. Hard works for us, and we'll make it work for you.

SEE MINING

SEE QUARRY

MOBILE CRUSHING

The high-volume, high-quality quarrying and crushing experts.

ANOTHER SEE SOLUTION

SEE Quarry

SEE Quarry, a division of SEE Group is a leading supplier of high volume, high specification quarry materials and customised solutions critical to the success of major mining projects across Australia.

As an integral part of SEE Mining's value chain, SEE Quarry is able to provide specialised mining support services including:

Mobile Crushing and Screening

Flexible, short-term, mobile crushing campaigns that reduce haulage costs and logistical delays by producing blasthole stemming and road base aggregates directly onsite.

Bulk Materials and Road Base Supply

Supply of engineered road base, drainage, sealing and concrete aggregates, thermal sand, foam bitumen, and general fill – enhancing site safety, stability, and overall operational efficiency.
